DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 17, 2005 has been entered.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: Claims 1-12 and 30-40 have been found to be allowable since while Tamagawa et al (U.S.Pat. 5,777,838) teaches an electrostatic chuck for electrostatically holding an object and having a dielectric member, the side of the dielectric layer facing the object provided with a plurality of pins. Logan (U.S.Pat. 6,754,062) discloses an electrostatic chuck having a dielectric base for supporting the chuck, and a conductive layer covering at least a portion of the top surface of the dielectric base for generating the electrostatic force of the chuck. Frutiger (U.S.Pat. 6,388,861) discloses an electrostatic wafer clamp having an electrically conductive platen, a resilient thermally conductive dielectric layer affixed to the platen and one or more conductive wires positioned on the dielectric layer and in contact with the wafer. But the prior art either alone or in combination, neither discloses nor makes obvious the combination of a chuck for holding an object by electrostatic forces comprising, among other features, a plurality of pins having a conductive layer on the surface in contact with the object having a specific resistivity less than

10 Ohm.m, as recited in the instant claims of the present invention. Applicant's arguments filed June 17, 2005 are deemed persuasive and incorporated herein by references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art Made of Record

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Frutiger (U.S.Pat. 6,388,861) discloses an electrostatic wafer clamp and has been cited for technical background.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung Henry V. Nguyen whose telephone number is 571-272-2124. The examiner can normally be reached on Monday-Friday (First Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Nguyen can be reached on 571-272-2258. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
